*Interoperable
Electronic
Health
Records*

Federal Health Information Exchange (FHIE)

Supports monthly, 1-time transfer of electronic health information from DoD to VA at the point of a Service member's separation

One-way, enterprise exchange of text data

FHIE Statistics

- 3.7 million patients
- 51.8 million lab results
- 8.6 million radiology reports
- 52.2 million pharmacy records
- 52.2 million standard ambulatory data records
- 1.6 million consultation reports
- Over 2.2 million separated Service members have presented to the VA

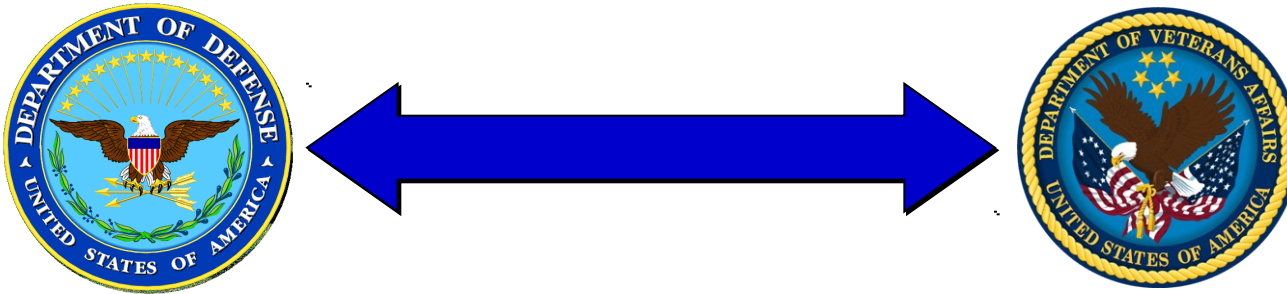

Deployment Health Assessments

- Enables VA healthcare providers to access Pre- and Post-Deployment Health Assessments (PPHDAs) and Post-Deployment Health Reassessments (PDHRAs) on separated Service members and demobilized Reserve and National Guard members
 - 1.5 million forms on 640,000 individuals
 - PPHDAs and PDHRAs transmitted monthly
 - PDHRAs transmitted weekly for individuals referred to VA for care or evaluation

Bidirectional Health Information Exchange (BHIE)

Enables real-time sharing of electronic health
information between DoD and VA for shared
patients

*Two-way, DoD BHIE sites and all of VA exchange of text
data*

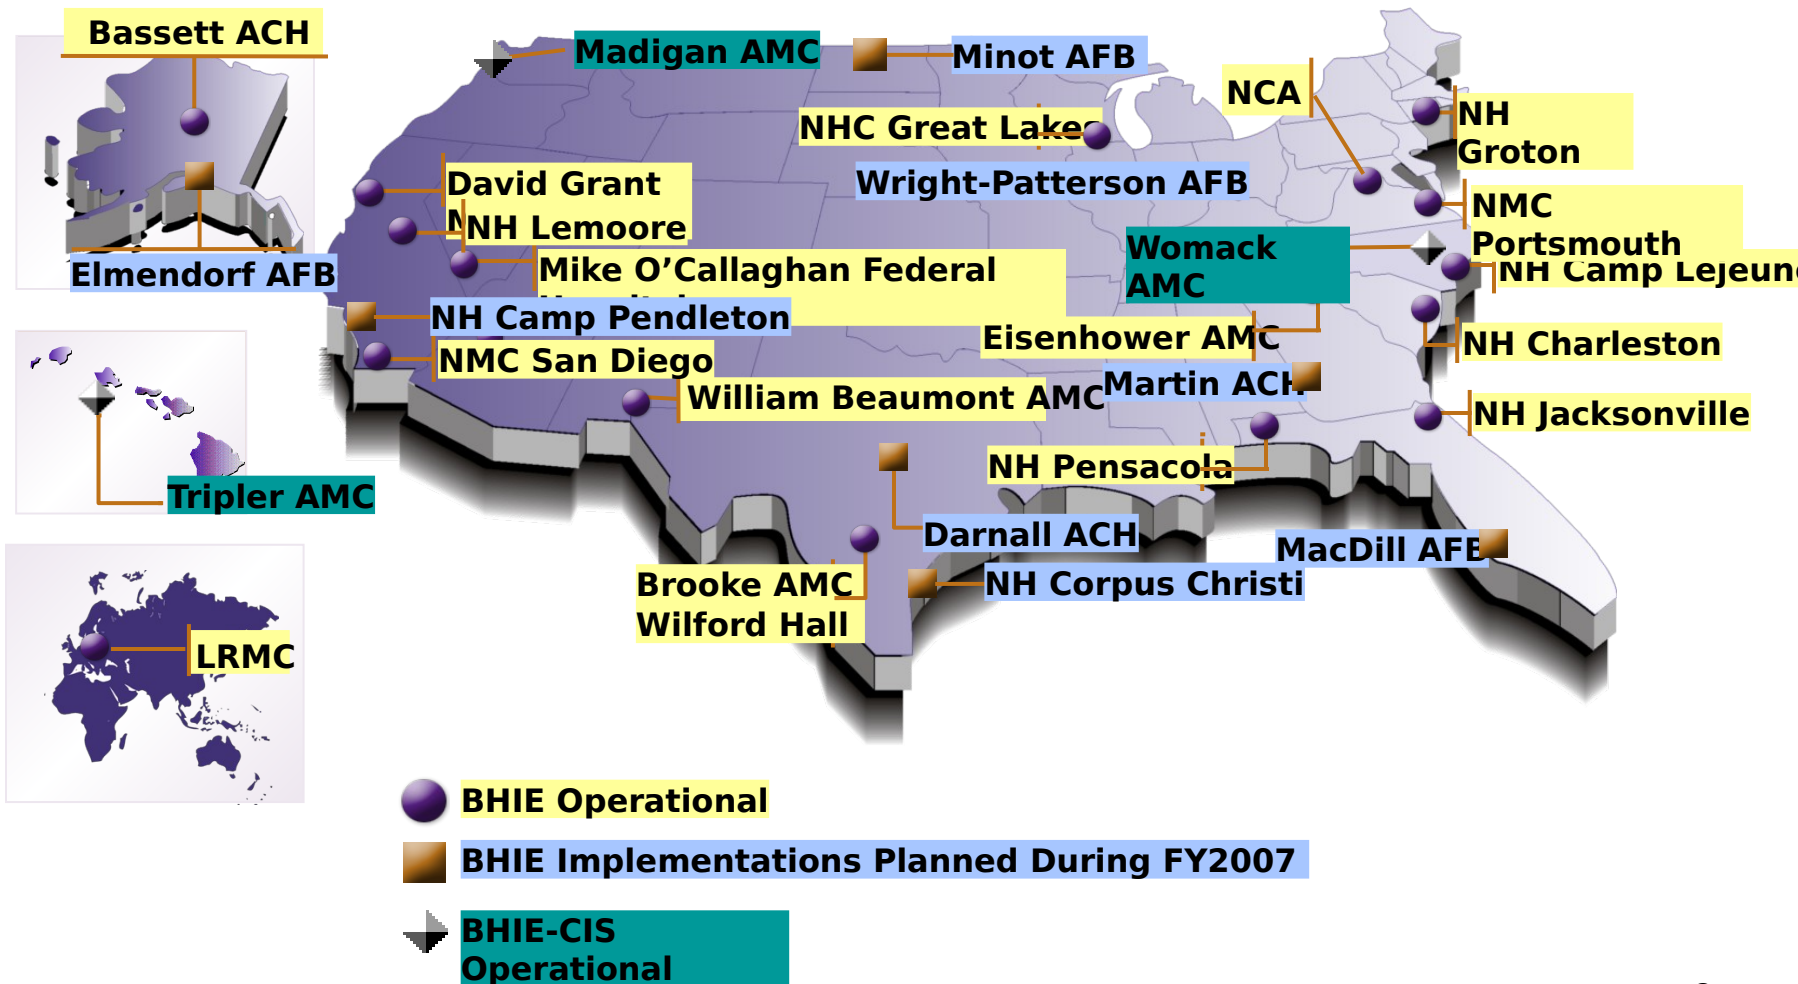

BHIE Statistics

- Real-time exchange of readable data
 - Patients treated in both DoD and VA
 - Data includes allergies, outpatient pharmacy, demographics, lab results, and radiology reports
- Operational at...
 - All VA sites
 - 14 DoD medical centers
 - 17 DoD hospitals
 - More than 170 DoD outlying clinics
- Over 9,900 weekly FHIE/BHIE queries (1st Qtr FY 2007)

BHIE Operational Sites

ROUTINE Exam # 02075609
Procedure: TIB/FIB (AP, LAT) (STATE WHICH SIDE) Exam Date: 10 Jun 2004@02101
Reason for Order:
38YR OLD MALE S/P MVC R/O FX
Order Comment:
Result Code: SEE REPORT TEXT
PROCEDURE: AP views of both legs. Note that the exams were performed on June 10 but not presented for interpretation until September 5.
FINDINGS: on the left, there are comminuted fractures of the distal diaphyses of the tibia and fibula. On the right, there are transverse fractures of the proximal shafts of the tibia and fibula with minimal comminution. Bandages and soft tissue gas are seen bilaterally, suggesting compound fractures are present. Plaster splints are seen bilaterally.

BHIE Enhancements

- Inpatient Document Sharing
 - Current: Discharge summaries
 - Future: Operative notes/ inpatient consultations
- Site-independent data pulled from CDR
 - Allergies, outpatient pharmacy, demographics, lab results, and radiology reports (3rd Quarter FY 2007)
 - Clinical notes, procedures, problems
 - Vital signs
 - Scanned/imported documents/images

TITLE: DISCHARGE SUMMARY
DICT DATE: JUL 24, 2005@11:48 ENTRY DATE: JUL 25, 2005@08:49:56
DICTATED BY: _____ ATTENDING: _____
URGENCY: routine STATUS: COMPLETED

DIAGNOSES:
Anemia
Myelofibrosis, CLL
CHF
A-fib
COPD

OPERATIONS AND PROCEDURES:
None

HISTORY OF PRESENT ILLNESS: _____ is a _____ yo gentleman with CLL and myelofibrosis resulting in chronic anemia, a-fib, and CHF, who is presenting progressive SOB on exertion and fatigue for about two weeks. He has been also feeling lightheaded when he stands up for one to two weeks. He could walk half a mile a month ago and now he becomes SOB just walking around his apartment. He usually gets RBC transfusion once in one to two months, last two during his last two hospitalization for SOB in 6/6 and 5/26. He endorses cough productive of white/clear phlegm that is chronic though, and occasional swelling around his ankles. He is normally active, walks every day. He denies CP, nausea, diaphoresis, palpitations, fevers/chills, recent travel or flight. He recently finished rituxan chemotherapy for CLL (early June). He denies any recent bleeding including melena, blood per rectum, injuries, hematomas.

ROS: Has some PND, also last night. Otherwise negative except what is in HPI.

PMH:
1 Myelofibrosis

Clinical Data Repository/Health Data Repository (CHDR)

Supports interoperability between DoD's Clinical
Data Repository (CDR) & VA's Health Data
Repository (HDR)

*Two-way,
Enterprise exchange,
Computable data*

CHDR Status

- Standardized, computable data
 - Outpatient Rx, medication allergies
 - Supports drug-drug and drug-allergy checks using data from both DoD and VA
- Operational at...
 - William Beaumont AMC and El Paso VA
 - Eisenhower AMC and Augusta VA
 - NH Pensacola and VA Gulf Coast
 - Madigan AMC and VA Puget Sound
 - NHC Great Lakes and North Chicago VA
 - NH San Diego and VA San Diego

Laboratory Data Sharing Initiative (LDSI)

Supports bidirectional electronic order entry and results retrieval of chemistry laboratory tests with either DoD or VA acting as a reference lab for the other agency

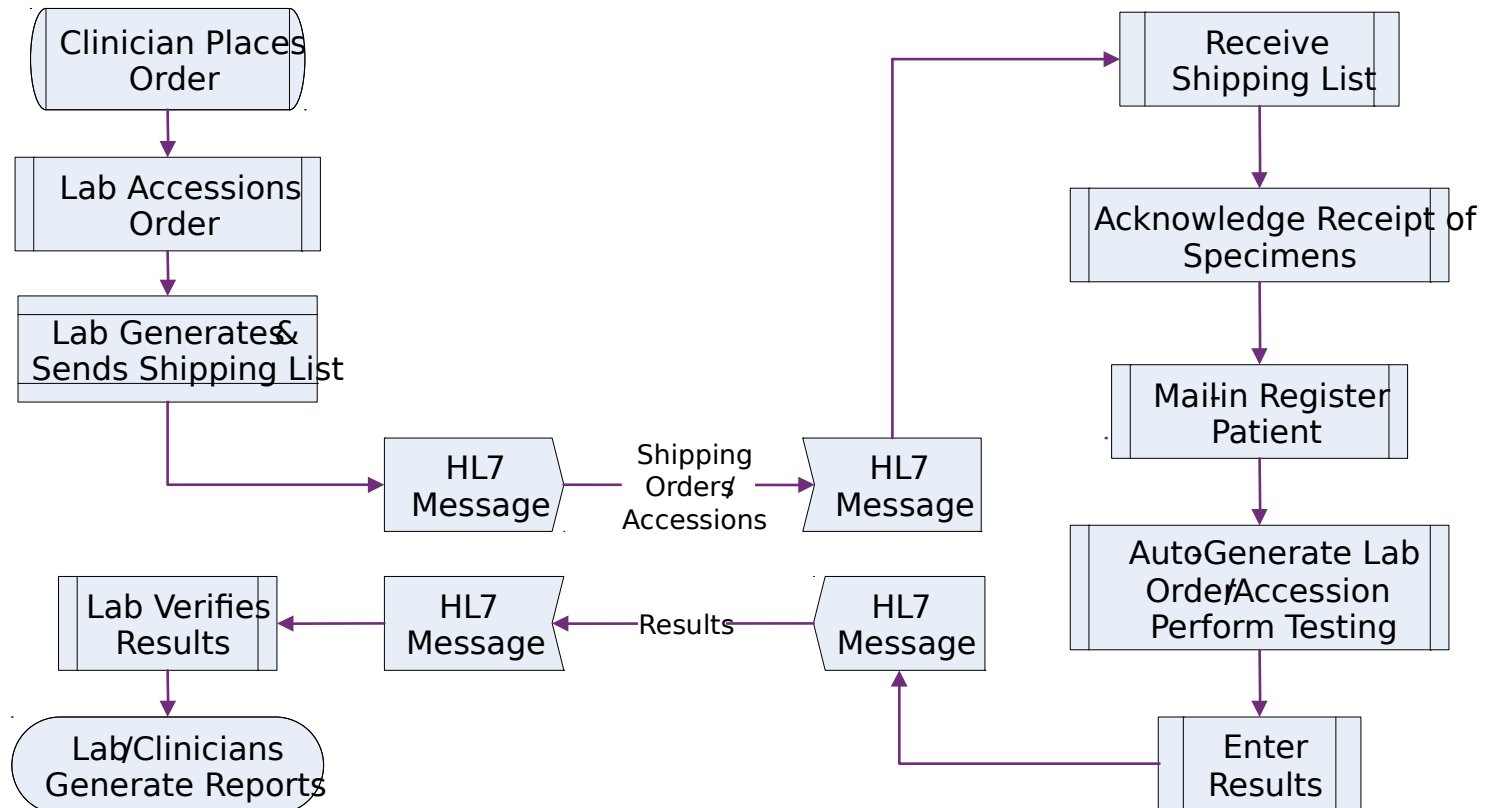

LDSI Workflow Diagram

COLLECTION LABORATORY

REFERENCE LABORATORY

LDSI Status

-
- Available for use throughout DoD and VA
 - Used daily where one Department serves as a reference lab for the other
 - Currently testing addition of lab anatomic pathology (AP) and microbiology orders and results

LDSI Operational Sites

Joint Inpatient Collaboration

- AHLTA, the DoD ambulatory electronic health record, is in place worldwide
- DoD is planning to enhance its inpatient automation capabilities by expanding its electronic health (EHR) record to include inpatient care
- Vista, the VA outpatient, ambulatory, and inpatient EHR, is deployed across all VA
- VA is planning to modernize its EHR, including the inpatient component
- Traditionally, DoD/VA IT sharing has been through systems interfaces
- Unique opportunity to explore a “born seamless” approach for an inpatient EHR

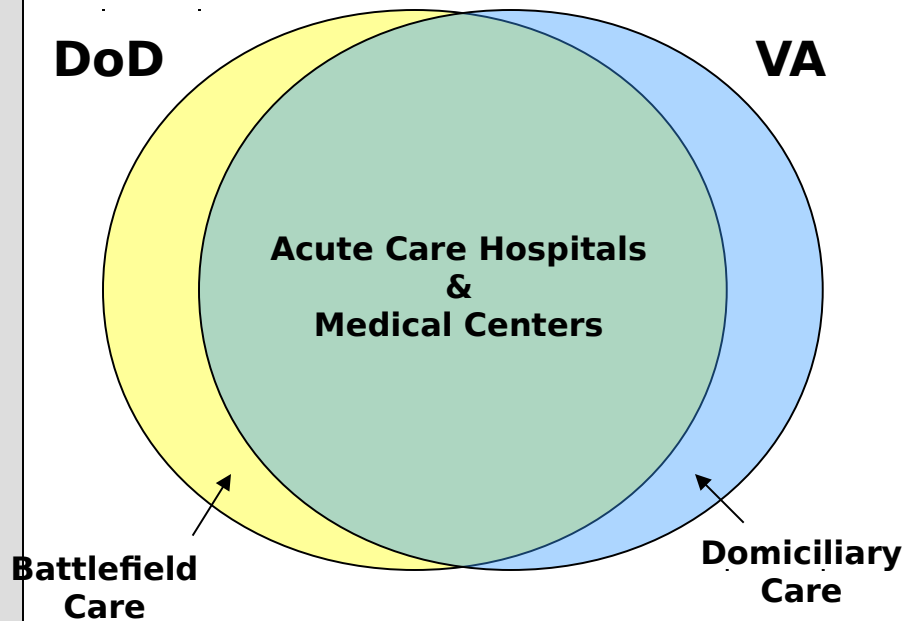

Joint Inpatient Collaboration

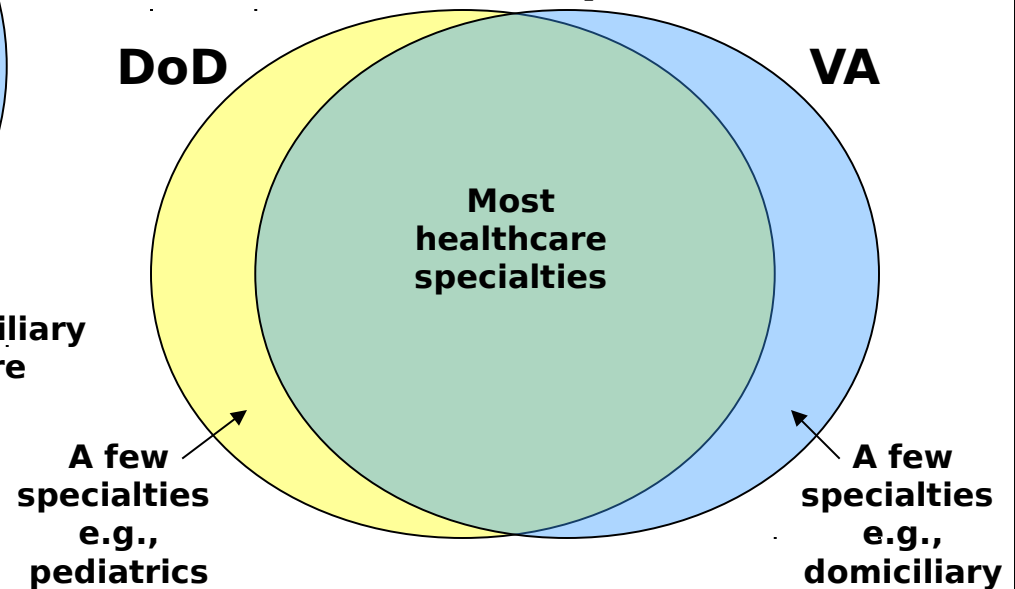

Most of DoD and VA inpatient healthcare is similar

Healthcare Venues

Healthcare Specialties

Joint Inpatient Collaboration

- Medical records must follow the Service member through venues of care within DoD & between DoD and VA
- Joint approach to an inpatient electronic health record will better support the continuum of care

Discussion and Questions
